

The Floralife® Dispensing System

Board Dimensions: 13" x 22"
Clearance Required: 6 1/2"

What Do You Need?

All that is needed is a fresh water source and a place to set or mount the FloraCare® unit.

How Does It Work?

Fresh water is mixed with the correct amount of concentrate solution. Just by pressing the nozzle, you can fill buckets and containers on demand.

Why Use a Dispensing System?

- Eliminates the guesswork
- Saves labor dollars
- Maximizes your FloraCare® investment dollars
- Dispenses the correct amount of Floralife® Fresh Flower Food each and every time
- Used successfully by professionals of all sizes and volumes
- This system pays for itself by reducing costly scrap and credits

Features:

- Not electric; powered by water
- Accurate dosing
- Wall mounted panel and countertop units available
- Rate flow is 7 gallons per minute

Countertop Unit

Use the Injection System to dispense Floralife Crystal Clear®, Clear Professional, Original, Professional Flower Foods and D.C.D.®

Other size units available.
Served by Dosmatic:
800.344.6767.
