

Floralife Clear Professional® 2X ULTRA Flower Food Floralife Professional® 2X ULTRA Flower Food

liquid double concentrated nutrient flower food

Two times more concentrated than Floralife Clear Professional® or Floralife Professional® flower food, new 2X ULTRA flower food has more active ingredients in every drop. In fact, a 15 gallon container of concentrate provides the same number of doses as a 30 gallon container of nonconcentrated product. More concentrated means less freight cost, less labor to change out containers when empty, and 50% less plastic used and needed to be recycled.

For Growers, Shippers, Bouquet Makers, Wholesalers, and Retail Shop Florists – all levels of the distribution channel. Great for processing, shipping, or shop displays when wanting to keep flowers from opening prematurely.

Features and Benefits

- Provides a balanced formula to lower the pH and increase the speed of flower hydration.
- Provides the appropriate amount of nutrients to inhibit premature bud opening and bent neck in flowers.
- Helps in keeping the flower stem's "plumbing" free flowing.
- Effective at room temperature and in storage coolers.
- Finished product is clear in all water types.
- Helps reduce flower scrap and customer credit adjustments.
- Can be used with all flower varieties.
- Reduces freight costs by shipping fewer containers.
- Half the amount of space required for product storage.
- 50% reduction in disposable container costs – more environmentally friendly.
- Reduction of handling required for container change outs and dosing setups.

Directions for Use

- Remove foliage from the flower stem area which will be located below the solution level in the flower container.
- Recut flower stems with a clean, sharp cutting tool, taking off at least 1 inch.
- Place flower stems in a clean bucket of solution and keep them treated during transport and storage until it is time to prepare them for consumer sales. Add additional solution as needed. Change out bucket solution at least once per week and use clean buckets prior to filling with new solution.
- After treatment with this product, use Floralife® flower food solution to aid in opening up the flower buds for a beautiful display.

Dosage

- 1:200 (0.5%) – Dispense 1 tsp. Floralife Clear Professional® 2X ULTRA or Floralife Professional® 2X ULTRA flower food per one quart of water. Read and follow label directions. Make sure dosing injector systems have been adjusted to accommodate this double concentrated formula.

Available in 15, 30, 55 and 220 U.S. gallon containers.
