

Floralife® eZ Dose® Flower Storage Solution

traceable storage solution

A fast-dissolving, traceable storage solution, Floralife® eZ Dose® Storage Solution product is a convenient holding and shipping treatment. It is made in a micro-perforated packet so it can be directly placed or dropped into a clean flower bucket without having to tear the packet open for use. The micro-perforated holes allow water to penetrate into the packet quickly and dissolve the flower food powder once it hits the water. The fast dissolving patented technology of the packet ensures quick mixing of the contents throughout the entire bucket of water. It is available in premeasured food amounts to accommodate different bucket volumes of water, making the dosage correct for the greatest flower performance.

The micro-perforated packet is a very bright, vibrant color which is easily seen and should remain in the bucket until it is time to reclean the flower buckets and change out the food solution. This colorful packet serves as a great tool for store management as a visual identifier to confirm the treatment has been made.

For Wholesalers, Bouquet Makers and Florists

Use as a convenient and easy way to store flowers in a fresh flower solution.

Features and Benefits

- Appropriate amount of nutrients to prevent premature bud opening.
- Adjusts the pH of the water for best flower food hydration performance.
- Keeps the stem's "plumbing" free flowing.
- Can be used on all types of flower varieties.
- Aids in reducing scrap and customer credits.
- Effective at room temperature and in refrigeration.

Directions for Use

- Remove flower foliage that will be below the solution level in the container.
- Recut flower stems with a clean, sharp knife.
- Put one sachet of Floralife® eZ Dose® Storage Solution into a clean bucket with the appropriate amount of water (no opening of the packet needed).
- Cut flowers should remain in product during transport up to selling to the end consumer. Change solution at least once a week.
- After treatment with this product, use a Floralife® flower food to aid in extending flower vase life.

Read and follow label directions.
