Floralife® Clear Professional Flower Food - A New Alternative

Floralife® Clear Professional

Floralife® Clear Professional is a new addition to Floralife's line of flower foods. Clear Professional provides an alternative to using Floralife Professional as a storage solution and is formulated to yield a clear solution.

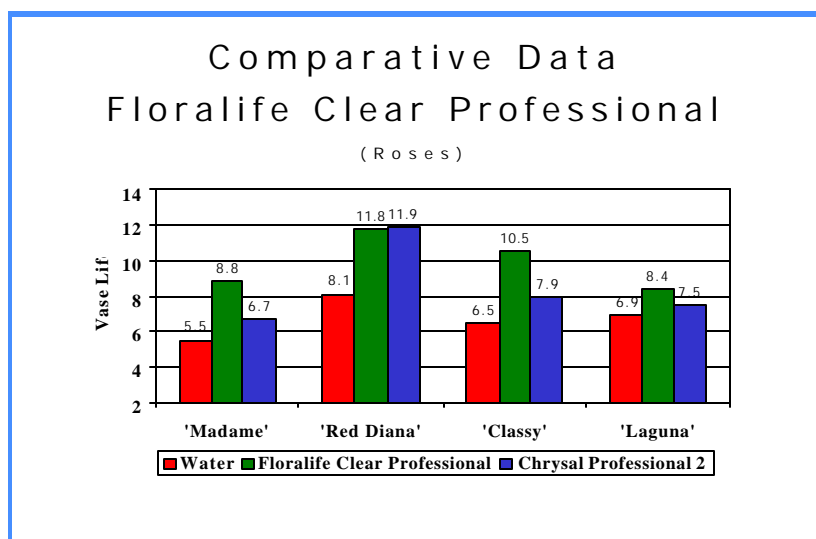

Dosing:

Manual mixing: Use 10ml per liter/quart of water (or 40ml per gallon).

Automatic dosing systems: Set the dosatron to 1%.

Efficacy:

Below is a chart showing efficacy data using Clear Professional as a holding solution for several crops of cut flowers. Also included in the study are water and Chrysal Professional 2.

Conclusion

Using solution of Clear Professional extends the vase life of cut flowers longer than using either water or Chrysal Professional 2.
