Effects of Floralife Finishing Touch™ Finishing Spray Mist on Cut Flowers

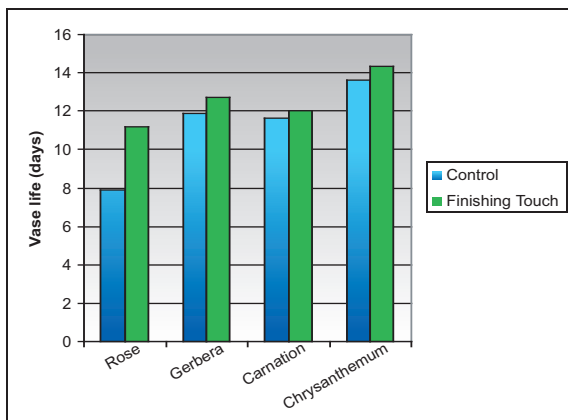

Background

Floralife Finishing Touch™ finishing spray mist is used to refresh, hydrate and protect fresh flowers, foliage and potted plants. This product is ideal as the finishing step to floral projects such as vase designs, corsages, arrangements, and wedding designs.

Research

An experiment was conducted in the Floralife® laboratory to test the effects of Floralife Finishing Touch™ finishing spray mist on several cut flower types. Fresh cut flowers placed in Floralife® flower food were misted with either water (control) or Floralife Finishing Touch™ finishing spray mist. After the spray, flowers were kept in an evaluation room and evaluated for postharvest quality.

Results

Water Floralife Finishing Touch™ finishing spray mist
Appearance of Flowers on Day 12

Conclusion

Floralife Finishing Touch™ finishing spray mist is beneficial for the cut flowers tested.
