

Floralife *Original* Fresh Flower Food

The Original Formula

Floralife Original Fresh Flower Food provides the nutrition flowers need for maximum consumer enjoyment. Floralife Original is effective in all water qualities and with virtually any variety of fresh flowers.

How does it work?

- Acidifier - to adjust the pH of the water
- Sugar - as an energy source
- Stem unpluggers - to help keep the stem's "plumbing" free flowing

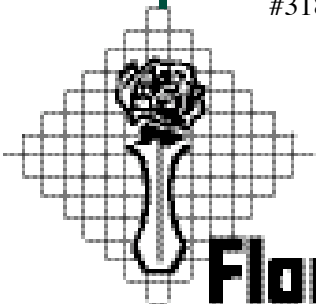

Features:

- Hydrates and nourishes fresh flowers
- Effective in all water qualities
- Many sizes available to suit every user / consumer
- Floralife powders can be purchased in numerous bulk sizes - pails and bags
- 5 and 10 gram packets available to include with bouquets
- One gallon liquid concentrate available
- Specific sizes available to use in Floralife injection systems

Floralife Original can be dispensed using:

- Automatic Sink Proportioner
- FloraCare Dispensing System (3.3% setting)

<u>Item#</u>	<u>Size</u>	<u>Use Solution Yield</u>
